

Training on how to use the Toolkit to build charts and calculate banking industry indexes using FiinPro

With the desire to help users discover features and optimize working performance on the FiinPro system during the data mining and analysis process, in January 2024, The Library of Ho Chi Minh University of Banking has informed all units, faculties, and departments of the HUB about the training session with the topic “Instructions for using the Toolkit to build charts and calculate banking industry indexes”.

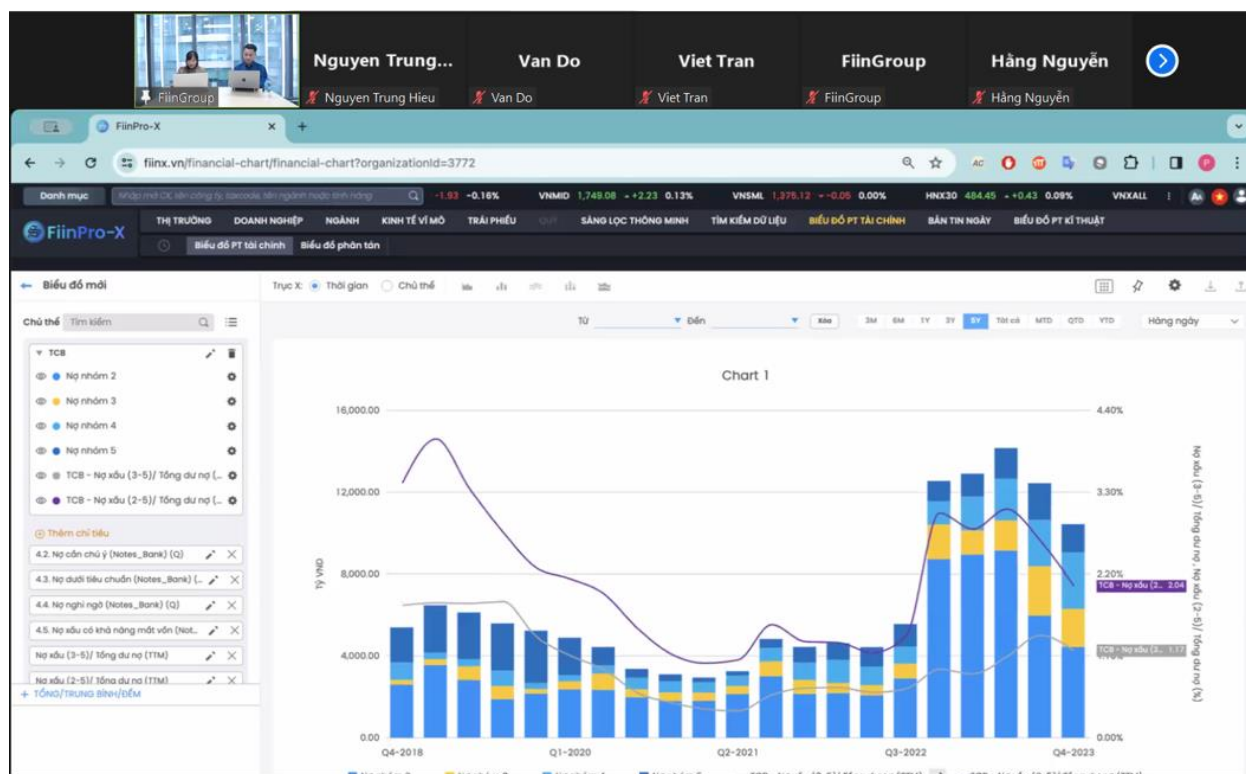

On the afternoon of January 25, 2024, based on the online platform, the training session was conducted by speakers from FiinGroup including Ms. Do Hong Van - Data Analysis Team Leader, Financial Information Services Division, and Mr. Tran Phu Viet - Head of Research & Product Development, Financial Information Services Division. With the participation of nearly 100 lecturers, students, investors, and analysts from banks, securities companies, and funds... interested in the topic, the training session provided instructions on how to use the chart-building tool and calculate banking industry indexes directly on the Fiinpro application.

FiinGroup experts guide how to use FiinPro – X to analyze banking industry stocks

This application has systematized the analysis of banking industry stocks with 6 main index groups including profit quality, asset quality, liquidity, capital adequacy, operational efficiency, and stock valuation. All information about these indicators is updated closely according to the information disclosure of banks in the market, helping research, learning, and analysis to be fully carried out.

Through the Financial Chart feature, Fiinpro can support lecturers, students, and analysts to build diverse types of charts according to the actual analysis needs of each bank stock and compare them with other banks in the market. At the same time, with quite diverse data on events associated with businesses, financial indicators, price indexes, and financial reporting information... can bring analytical techniques accurately, quickly, and in a variety of analytical directions.

Using the Financial Chart feature to build a group of overview graphs (dashboard) on FiinPro

Since 2021, The Library of Ho Chi Minh University of Banking has been equipped with dedicated workstations for readers to retrieve data from FiinPro®. Lecturers and students of the HUB can easily access directly using the machine on the first floor of the Library, and lecturers can access it remotely through software installed on personal computers.

Readers can find out information and register to use the Fiinpro database at The Library of Ho Chi Minh University of Banking at the link: [FiinPro database](https://library.hub.edu.vn/?ArticleId=502ad314-1e4a-4c0e-9fed-cf2c44bd318a) (or link: <https://library.hub.edu.vn/?ArticleId=502ad314-1e4a-4c0e-9fed-cf2c44bd318a>)
